APRIL 1 POTATO STOCKS ABOVE LAST YEAR

An estimated 89.0 million cwt. of potatoes for all uses were in storage in the fall producing areas on April 1, 1978. This is 9 percent above a year earlier and 24 percent more than in 1976.

The regional breakdown is as follows: The eight Eastern States had 13.0 million cwt. in storage, up 23 percent from a year earlier. Maine's stocks of 11.0 million cwt. compare with 8.4 million cwt. in 1977. New York and Pennsylvania continue to show stocks below last year's level. Stocks in the eight Central States totaled 14.0 million cwt., 73 percent above a year ago. Minnesota, North Dakota and Wisconsin continue to show stocks significantly greater than last year. The eight Western States had 61.9 million cwt. in storage, down 2 percent from 1977 due mostly to significant reductions in Washington. Stocks in Idaho were 37.5 million cwt., 6 percent above last year.

Disappearance of the 1977 fall crop to April 1, 1978 was 210.2 million cwt. (excluding Nevada), a decrease of 5 percent from a year ago.

The quantity of potatoes processed to April 1, 1978 in the seven major States is 82.6 million cwt., 7 percent less than last year.

NOTE: Stocks are defined as the quantity remaining in storage for all purposes and uses, including shrinkage and waste and other losses that occur after the date of each report. Sales of fall potatoes for all purposes generally account for about 90 percent of the total fall production. Shrinkage and loss and home use account for the remaining 10 percent.

TABLE 1. FALL POTATOES: PRODUCTION; AND DECEMBER 1, JANUARY 1, FEBRUARY 1, MARCH 1, AND APRIL 1 TOTAL STOCKS, CROPS OF 1967-77 IN THE FALL STATES

CROP YEAR	PRODUCTION	TOTAL STOCKS				
		DEC 1	FOLLOWING YEAR			
			JAN 1	FEB 1	MAR 1	APR 1
		1,000 CWT				
1967	243,849	161,500	139,170	112,640	86,465

1/ STOCKS INCLUDED IN "OTHER STATES". 2/ NOT INCLUDED TO AVOID DISCLOSURE OF INDIVIDUAL OPERATIONS. 3/ USERS ARE CAUTIONED THAT THE STOCKS ESTIMATE FOR NORTH DAKOTA MAY BE LESS RELIABLE THAN FOR THE OTHER STATES DUE TO THE LARGE NUMBER OF NORTH DAKOTA STORAGE OPERATORS WHO REFUSED TO REPORT STOCKS ON THE APRIL 1978 INQUIRY.

POTATO STOCKS QUALITY SURVEY

MINNESOTA AND NORTH DAKOTA (RED RIVER VALLEY)

The potato stocks quality information contained in this report is based on a survey conducted by the Economics, Statistics, and Cooperatives Service in the Red River Valley of North Dakota and Minnesota. A total of 129 samples selected on a random basis were placed in storages at harvest time. This report, which shows the cumulative average grade and weight loss for the potatoes removed from storage at the time of shipment, will be the final report issued for this season.

At the request of the Red River Valley Potato Growers Association, samples were selected this year for processing potatoes only. Since few Red-type potatoes are used for processing, data are not published for this type.

Samples recovered before April 1, 1978 indicate that the quality of the white and Russet varieties was higher this year at harvest and also for those removed from storage by April 1. The decline in No. 1 grade (including B's) for samples removed from storage this year was 14 percent (12 points) for white varieties and 12 percent (10 points) for Russet varieties. This compares with a 24 percent decline for white varieties and a 15 percent decline for Russet varieties during the same period a year earlier. The percent graded as culls after storage is below a year ago for both varieties. Total weight loss while in storage for samples recovered to date is the same as last year.

Final data for the 1976-77 storage season are also provided and show the average grade at harvest and after storage for all samples which were recovered from storage.

POTATO STOCKS QUALITY SURVEY, RED RIVER VALLEY, 1977-78

AVERAGE GRADE OF POTATOES

TYPE	NO. 1		NO. 2		CULLS		NO. 1 B'S	WEIGHT LOSS
	INCLUDING B'S						AFTER	
	AT HARVEST	AFTER STORAGE	AT HARVEST	AFTER STORAGE	AT HARVEST	AFTER STORAGE	STORAGE 1/	
	PERCENT							
	SAMPLES RECOVERED BEFORE APRIL 1, 1978 <u>2/</u>							
WHITE	87	75	7	11	6	14	6	5
RUSSET	86	76	6	11	8	13	7	4
	SAMPLES RECOVERED BEFORE APRIL 1, 1977 <u>2/</u>							
WHITE	86	65	8	14	6	21	9	5
